State of Illinois
Illinois Department of Transportation

STUDENTS WANTED

Illinois Department of Transportation Engineering Academy

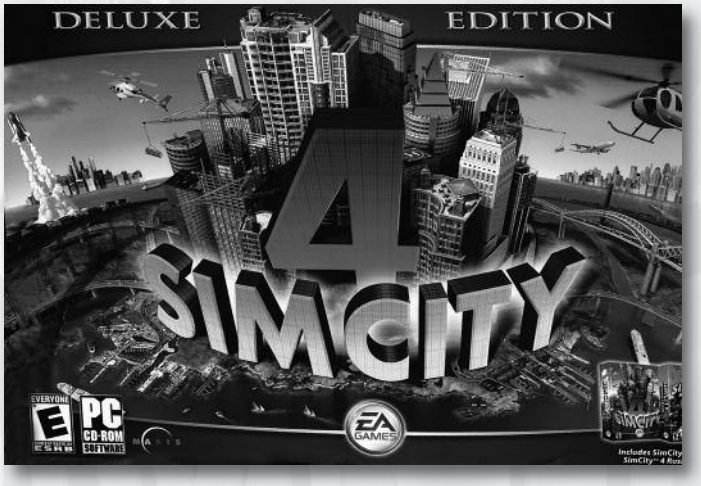
Transportation and Civil Engineering (TRAC) modules will be used.

TRAC is a hands-on program that teaches students how to use math and science to solve real world problems in transportation and civil engineering.

First Class Sessions
October 2009

What is the IDOT Engineering Academy?

The goal is to provide realistic engineering experience through projects that encourage teamwork, problem solving and practical application while exposing students to exciting and challenging career opportunities in the transportation industry.



Building your own city with Sim City 3000 software

Improve City by:
Improving living conditions
Decrease its transportation problems
Promote growth by twenty-five percent
