STANDARD SPECIFICATIONS FOR ROAD AND BRIDGE CONSTRUCTION

1. POLICY. Road and bridge construction shall be performed according to the standards set forth in this Policy.

2. PURPOSE. The purpose of this Policy is to provide for the publication of a book prescribing the Standard Specifications for Road and Bridge Construction.

3. GUIDELINES FOR IMPLEMENTATION. The book outlines the general requirements and covenants applicable to all highway construction improvements as well as provisions relating to materials, equipment, and construction requirements for individual items of work (as defined in the book) on road and bridge construction projects awarded by the Department.

   The book provides detailed requirements on such subjects as:
   a. General Requirements and Covenants
   b. Earthwork, Landscaping, Erosion Control
   c. Subgrades, Subbases, and Base Courses
   d. Surface Courses, Pavements, Rehabilitation, and Shoulders
   e. Structures
   f. Incidental Construction
   g. Work Zone Traffic Control, Signing, and Pavement Marking
   h. Electrical Requirements
   i. Materials
   j. Equipment

4. RESPONSIBILITIES. The Division of Highways and its Districts shall implement the standards published in the book accompanying this Policy.

5. ACCESSIBILITY. Copies of this Policy may be obtained from the Bureau of Design and Environment in the Harry R. Hanley Building. This Policy may be examined in the Hanley Building Library and in each of the nine District Highway Offices. Copies of this book may be obtained from the Bureau of Highways Administration, in the Hanley Building.

   CLOSING NOTICE. Supersedes: Departmental Policy DES-6, Standard Specifications for Road and Bridge Construction.

Approved: James P. Shifer March 23 2001

PREFACE

Information which has been changed from the 1997 Standard Specifications is generally noted with vertical lines in the outside margin. These lines are intended to facilitate the location of new material, but provide no guarantee, explicit or implicit, that text not highlighted has appeared in prior editions of the Standard Specifications.

Information covering electrical items (Section 800) has major revisions and has been restructured.
