

Continuum Dynamics, Inc. Company Overview

Continuum Dynamics, Inc. (CDI) was founded in March 1979. Our charter is to provide high quality, cost effective engineering services and state-of-the-art technical solutions for customers in government and industry. For over thirty years, CDI has undertaken a wide range of research and development activities including contract research activities, software development and licensing, engineering design services, design of advanced actuators and robotic systems, and a wide range of prototype fabrication and test support work. Our government and industry customers come from a wide range of interests including aerospace technology, electric power generation, nuclear reactor safety, forest management/agrochemical applications, and pharmaceuticals. Our customers have included a wide range of major U.S. and international commercial enterprises in these areas, as well as NASA; the U.S. Departments of Defense (Army, Navy, Air Force, DARPA, and Special Operations Command), Energy, Agriculture, and Transportation; the National Institutes of Health; and the U.K. Ministry of Defense. Our technical staff numbers 20 and includes 9 Ph.D. level investigators, 7 other professional engineers and technicians, and four support staff. We are supported by a wide range of internationally recognized consultants in academia and private industry who specialize in aircraft aerodynamics, acoustics, computational fluid dynamics, computational biochemistry, structural dynamics and aeroelasticity, and materials science.
