

Context Sensitive Solutions (CSS) Awareness Class

Course Objectives

This class is designed to provide supervisors with the understanding of the department's policy on CSS and how the CSS process is addressed in all phases from planning through operations.

CSS Learning Outcomes:

Upon successful completion of this training, participants will have an understanding of the following:

- The history of CSS from the federal and state perspectives, including Public Act 93-0545
- Departmental policy D & E 21 on CSS
- BDE PM 48-06
- The CSS concept and basic principles;
- The guidelines for the stakeholder involvement process
- How to identify stakeholders
- The principles of flexibility in design
- Importance of construction and operations; and
- The importance of documenting decisions during the CSS process.
